About This Book

Are you interested in traditional names? Those names that are 'tried and true' which have been used by countless generations? Perhaps a rare name? This work catalogs many of them that have been found in usage over the last 200 years. A few are older than that. I took the liberty of examining several church registers of baptisms and marriages in the provinces of British Columbia, Ontario, Quebec, Nova Scotia and Newfoundland. The result is this concise (but by no means complete) list of names that were in popular usage over 100 years ago.

True, it is only a list. No pronunciations given or meanings to names are recorded herein. It is left to the reader to go and consult online search engines. However, in doing so, more variations to names are commonly found.

The main influences on names in the 19th century were Christian, Jewish and ancient Greek culture. This work also includes from a few Canadian church records some Italian, Syrian, Arabic and North American Aboriginal names.

Some names may seem funny if not ridiculous to the modern reader. However, some of our 21st century names might have sent our ancestors into laughter as well.

The intention of this work is to help those searching for alternative names that do not always appear on other baby name lists.
